

# ACCPAC® ePOS

# INTEGRATED RETAIL MANAGEMENT

ACCPAC *e*POS is a comprehensive point of sale (POS) solution specifically designed for fast-paced, high-volume, multi-site retail operations, providing a complete view of your entire enterprise.

## REAL-TIME POINT OF SALE

Real-time business means you can effectively manage your entire enterprise while quickly reacting to changing market conditions. Featuring an intuitive Web-based interface, ACCPAC *e*POS™ provides a complete view of your enterprise inventory, customer activities and inventory management. *e*POS delivers transparent and real-time integration to your back-office solutions while providing secure synchronous connectivity to your multiple locations.

## STREAMLINED ACROSS YOUR ENTERPRISE

ACCPAC *e*POS is all about efficiency, reliability and profitability. *e*POS allows you to monitor retail activities across multi-site operations so you can focus on growing your business while meeting sales objectives.

*e*POS enables you to streamline your entire enterprise. Adding to this process, *e*POS integrates with your ACCPAC Advantage Series™ accounting system creating a single source to review and evaluate your financial performance and records. Additionally, *e*POS automates the customer checkout process, discounts, layaways, electronic payment processing, reporting and much more. Customer and product information is instantly accessible at checkout.

## EFFICIENT AND SECURE

ACCPAC *e*POS takes point of sale to a higher level by securely utilizing the Internet to connect remote retail locations to your central location in real time, running securely over the Internet. This allows you to view inventory levels in real time as well as evaluate sales success of each location immediately. No manual reporting on reconciliation is required. *e*POS is not only efficient and secure, but also user-friendly and scalable. Everything comes together with this top-notch retail management solution making it easy to operate your business and increase productivity.

- Save money
- Save time
- Gain control of your business
- Increase profits

## A WHOLE NEW LEVEL OF CONTROL

From start to finish, ACCPAC ePOS lets you gain control of the entire retail enterprise. Multiple sessions can be opened on the same till to control and monitor individual clerk cash and operations. A sign-on feature ensures that both operator and till are registered before recording transactions.

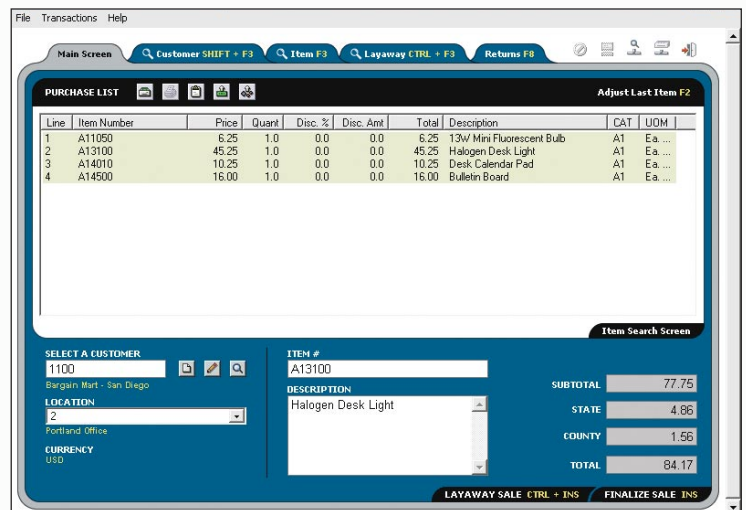

All transactions from connected locations are posted in real time to the central location as they become finalized in the system. For offline remote sites, transactions can be transmitted at any time.

Reports include:

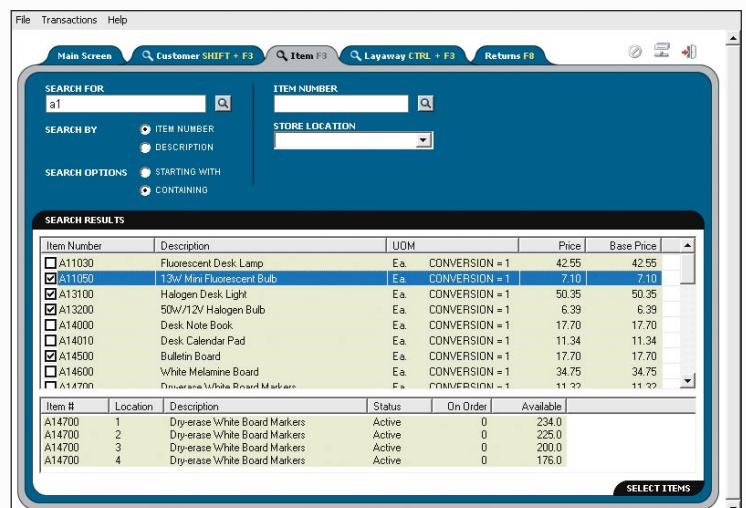

- Floats
- Balances by tender type
- Transactions
- Balances by cashier
- Sales by category
- Layaway sales
- And more!

## THE BOTTOM LINE

Imagine greater efficiency, increased revenue and satisfied customers. With ACCPAC ePOS your retail business operates on a whole new level. Experience the benefits of tracking and managing sales and inventory across your entire enterprise in real time, and increase your productivity today with ACCPAC ePOS.

With ePOS, real-time customer and product information is instantly accessible with a click of the mouse.

ePOS automates the customer check out process from discounts to payment processing.

# DO MORE WITH ACCPAC ePOS

Managing your retail enterprise is easy with ACCPAC ePOS. It's like having a dedicated manager at each of your storefronts tracking inventory, sales, and all customer and store activities.

## REAL BUSINESS BENEFITS

ACCPAC ePOS offers a breadth and depth of features that are not commonly found in other POS solutions. From improved efficiency to complete integration with ACCPAC accounting systems, ePOS enables you to control the entire retail enterprise.

- **Internet-based** – ePOS links remote retail locations to your head office over the Internet (dial-up or dedicated connection). A single installation of ePOS server connects multiple ePOS tills at remote locations. Since ePOS deploys over the Web, one store can view available stock at another store or put a sale on account for a customer.
- **Multi-till/Store Operations** – ePOS supports multiple tills connected over a local area network (LAN) that links to your head office over the Internet.
- **Security** – ePOS provides user access security at a detailed POS function level. The ACCPAC ePOS Server encrypts the data going to/coming from ACCPAC ePOS, ensuring secured transmissions over the Internet.
- **Real-time Processing** – ePOS links with ACCPAC Accounting Solutions to provide real-time validations and updates to and from the centralized inventory and customer database. Real-time integration with your ACCPAC accounting system saves you valuable time by eliminating month-end reconciliation procedures and manual benefits. You'll benefit significantly from at-a-glance updates that instantly connect you to every area of your retail enterprise.
- **Integrated Receivables** – ePOS enables selling to Accounts Receivables customers (on-account) utilizing their price lists and pricing levels. You can check customers' credit limits, active and inactive status, and prohibit sales to on-hold customers. New customers can be defined in ePOS and will be auto-populated in the Accounts Receivable module.

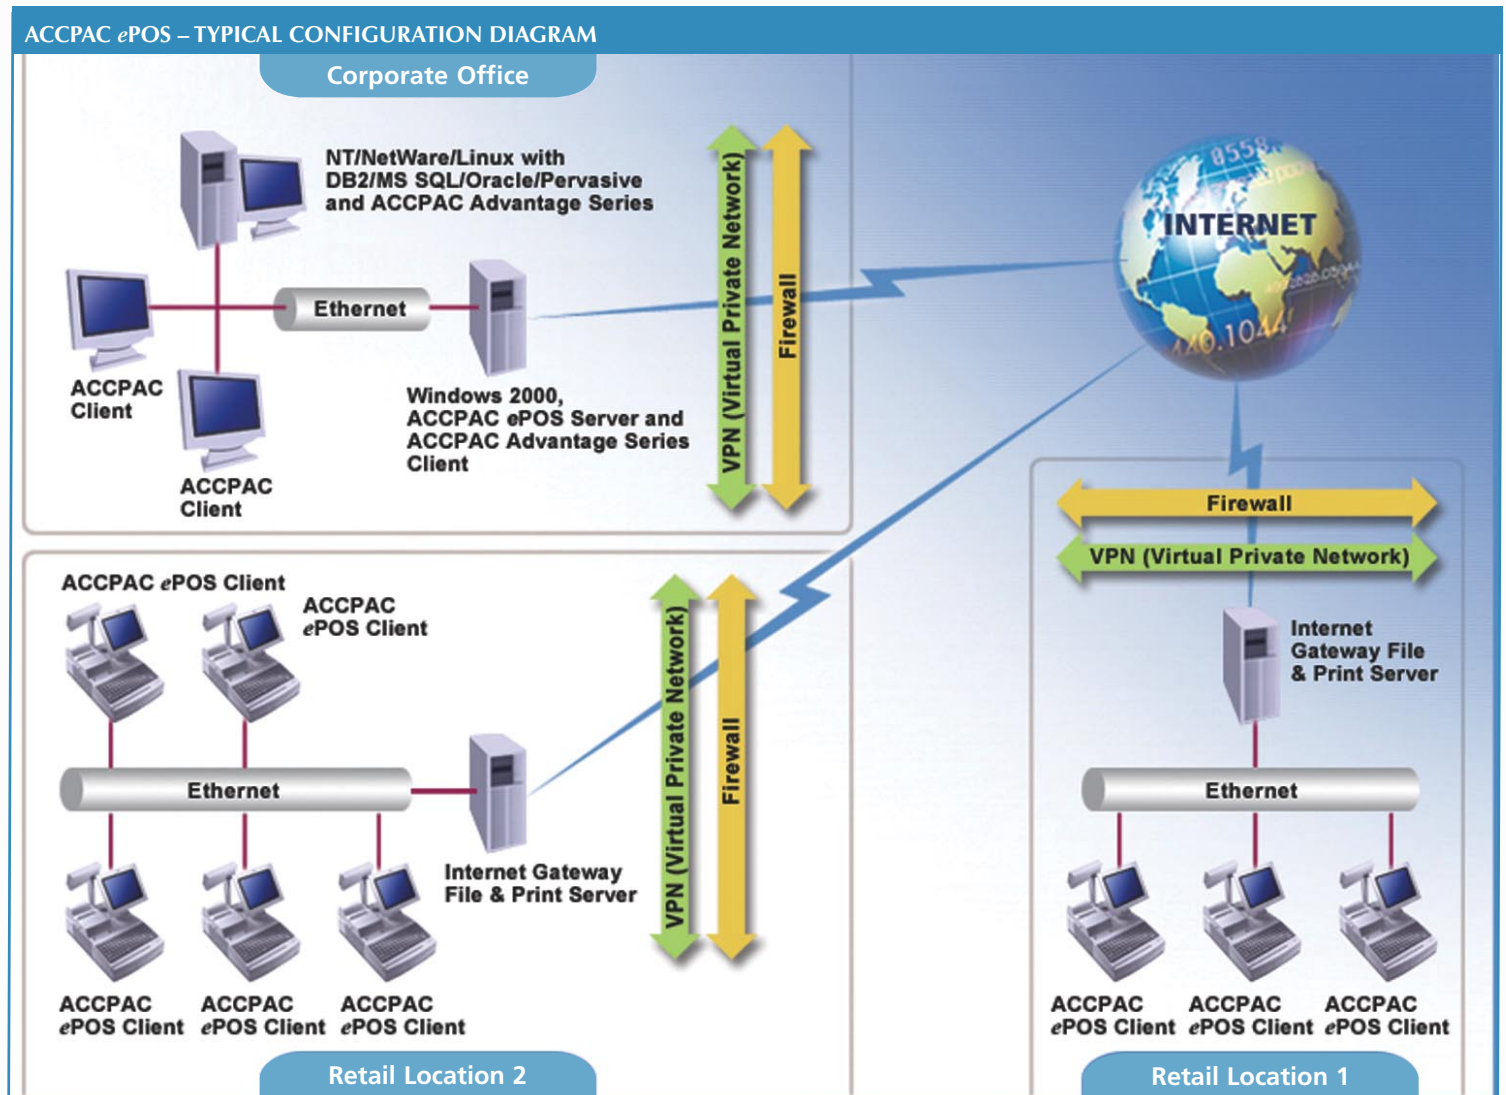

- **Integrated Order Entry** – ePOS utilizes special item pricing and can create quotations, order confirmations, invoices, credit notes and receipts in the Order Entry module, extending the Advantage Series Order Entry module to the retail storefront.
- **Handles Complex Pricing Rules** – ePOS integrates with Advantage Series Inventory Control and Accounts Receivables modules to ensure that the price customers should be paying for items is indeed the price they are charged.
- **Technology Leadership** – ePOS integrates barcode readers, weigh scales, pole displays, magnetic stripe readers and other POS technologies you rely on every day.

Sales Person Name	Percent	Amount
Bill Bhaissou	100	84.17

ePOS is easy to use, deploys over the Web and links to remote retail locations in real-time.

- **Easy Operation** – ePOS is easy to use. Single keystroke options and touch screen support is available for many common operations such as sale completion, payment, item return, suspend sale, quotation and cash drawer opening.

- **Credit Card Approval** – ePOS accommodates credit card transactions. Use the built-in interface for Debit and Credit Card processing applications. Payments made with credit cards can be authorized in real-time.

ACCPAC ePOS provides efficient, secure control of your retail operations through a real-time Internet-based network.

# YOUR COMPLETE POINT OF SALE SOLUTION

ACCPAC *ePOS* is built from the ground up to satisfy your most critical business needs. It's efficient, secure, user-friendly and scalable – making it easy to operate your business and increase productivity.

## ***ePOS* IS EFFICIENT**

Integration with all retail technologies – including barcode scanners, real-time credit card processing, weigh scales, pole displays and more – increases check-out speed and accuracy while providing real-time integration and reporting across your enterprise.

## ***ePOS* SUPPORTS MULTIPLE REMOTE SITES**

Checking inventory or determining daily sales statuses at remote locations is effortless with *ePOS*. All you need to link your head office with remote locations is an Internet connection between the locations.

## ***ePOS* IS SECURE**

*ePOS* is securely deployed across a local area network or the Internet. The ACCPAC *ePOS* Server encrypts the data going to and coming from ACCPAC *ePOS*, ensuring secured transmissions.

## ***ePOS* IS USER-FRIENDLY AND SCALABLE**

Easily add users or sites as your business grows. A single server installation model makes it easy to add another workstation to extend the reach of your *ePOS* system, enabling fast and cost-effective deployment and ongoing maintenance.

## ***ePOS* EASILY INTEGRATES**

*ePOS* easily integrates to existing back-office accounting systems, eliminating manual reporting or redundant data entry. Every transaction at the point of sale automatically creates its own accounting transaction and updates on hand inventory information in real time.

# END-TO-END BUSINESS MANAGEMENT APPLICATIONS
